

IRON SOFT PLUS™ SERIES

The Self-Chlorinating Water Conditioner

*Sparkling
Water*

*Softer
Laundry*

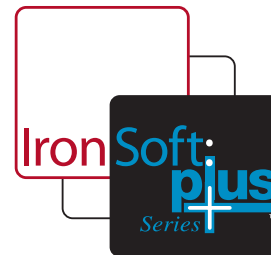

*Cleaner
Dishes*

The Iron Soft Plus Series is a multi-purpose water treatment system that effectively removes hardness, iron and manganese; raises pH; and disinfects itself automatically during regeneration.

- A single, advanced water treatment system especially designed for well water
- Four units in one: removes hardness, iron, manganese and raises your water pH
- No other equipment add-ons to buy
- Cleans and sanitizes itself automatically — no chemicals, additives or special handling required
- Odors and problems caused by iron and sulfur bacteria are virtually eliminated
- An advanced, patented, solid-state "system analyzer" monitors and communicates operating modes — even alerts you to low salt conditions

IRON SOFT PLUS™ SERIES

The Self-Chlorinating Water Conditioner

The Iron Soft Plus Series gives you the industry's most advanced control and operating features:

- Safe, low-voltage operation
- Non-corrosive valve made of high-tech, durable Noryl™ plastic
- Electronic meter model with "system day over-ride"
- All regeneration cycles are custom programmed for your specific water problems
- The System Analyzer tells you the Iron Soft Plus Series' status at a glance:
 - Green Light** — the system is producing clean, soft water and the chlorine generator is operating at full capacity
 - Red Light** — the system is in its regeneration and/or sanitizing cycle
 - Yellow Light** — indicates salt is low, or the sanitizing process is incomplete — also generates audible "chirp"
- User friendly design makes the Iron Soft Plus Series systems easy to operate and maintain

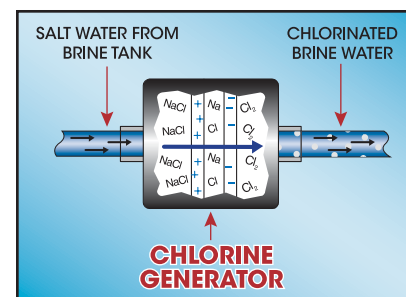

PROTECT YOUR WATER SYSTEM

Minerals and sometimes bacteria can enter your household water through the ground aquifer or the well itself. Many of these contaminants can end up trapped in your home's water softener system and, in most cases, cannot be completely removed through normal system regeneration.

Now you can enjoy clean, softened water throughout your house thanks to an advanced line of self-sanitizing water treatment systems — the Iron Soft Plus Series.

The Iron Soft Plus Series systems are ideal for all households using well water. They use Mineral-Right's exclusive Crystal-Right™ media to raise your water's pH, provide comprehensive softening, plus remove high amounts of iron and manganese, all in a single process. At the same time, the entire system uses a patented chlorine generator to disinfect itself automatically with every regeneration.

The chlorine generator safely creates chlorine from the softener's brine solution. The dissolved chlorine then sanitizes the media bed with each regeneration of the system.
